We asked Star Editor-in-Chief Roberto Torres to write a guest post on the relationship between print and digital. Read below. Print and digital media are firmly in place. Do they need each other? Probably not. When I'm going to the grocery store, I don't need a print newspaper to tell me what's available. I can read it online. The same goes for the price of milk, for that matter. And if we don't want milk with our ice cream, we can buy it. If we don't want to buy milk, we can go to Aldi instead of the grocery store. They have a bar that sells beverages in glass bottles. More important, there's a difference between the goals of print and digital, as well as their affordances. From my perspective, a major value of print journalism is its historical dimension. It is more comprehensive in the sense of storytelling and information than digital news platforms, which are directed to constantly creating and updating content. Digital journalism requires constant innovation, updating and updating. And as a result, digital journalism can feel ephemeral and temporary. Print journalism is just as much about maintaining a deep connection with the past. This is true even with the New York Times, which does a

good job of reinventing itself (it has a website and an app). As much as the New York Times strives for a modern perspective, it is very deeply rooted in the traditions of print journalism. It even has an editorial style that was best described by the New York Times' Washington bureau chief as being like a grand pianist at a recital. It has strengths and weaknesses, but it is identifiable. There are big advantages to a print newspaper, in that it is stable. It's as stable as the frozen yogurt machine. But it also has a role to play f678ea9f9e
